

Additional fee for establishing a system to promote healthcare DX (Digital Transformation)

Our medical clinic has introduced an online eligibility verification system to acquire and utilize information necessary for medical treatment, such as patients' medical history, medication information, and specific health checkup information, in order to provide high-quality medical care.

Furthermore, we have established the following systems:

- We have a system in place to conduct online eligibility verification.
- We have a system in place to allow viewing and utilizing medical information acquired through electronically eligible verification in examination rooms, etc.
- We are promoting the use of My Number Cards as health insurance cards through in-hospital notices and other means.
- We provide medical fee statements free of charge.

In addition, we are releasing information regarding our healthcare DX promotion system and the implementation of appropriate medical care through the acquisition and utilization of sufficient information on in-clinic notices and our website.

Our clinic has been claiming the " Additional fee 3 for establishing a system to promote healthcare Information sharing" since June 1, 2026.
